

Rockwell Software FactoryTalk® Software Portfolio

FactoryTalk® software is built for supporting an ecosystem of advanced industrial applications, including IIoT. It all starts at the edge where manufacturing happens and scales from on-premise to cloud. Imagine supercharging your industrial environment with software that offers cutting edge design, maximizes operational efficiencies, and delivers predictive and augmented maintenance advantages.

From process to batch to discrete applications, your most complex challenges are solved with the combination of award-winning Rockwell Automation software, hardware, and services.

Select from the following software options:

Now when you think of software from Rockwell Automation, remember that FactoryTalk is the most comprehensive and innovative software portfolio in the industry.

Software Portfolio

- Insight & Analytics
- Quality & Visibility
- Maintainability
- Productivity

FactoryTalk® is a registered trademark of Rockwell Automation.
